In cooperation with:

**International Microsurgical Training Centre IMTC, Lelystad
K. F. Wenckebach Institute, Groningen**

**Course Chairman:
James Brown, Liverpool**

S.O.R.G.

FLAP COURSE GRONINGEN

Nov. 22nd – 25th, 2006

FLAP COURSE

Aim of the Course:

Course participants will learn the basic anatomy and harvest techniques for the most commonly used local, regional and free flaps in head and neck reconstructive surgery. The use of fresh cadavers offers a unique opportunity to see and explore the anatomy as well as perform the operations in an ideal setting. Two participants will be allocated to each cadaver and so each will be able to perform and assist in each procedure with the assistance of 5 experienced Maxillofacial reconstructive surgeons as tutors. There will also be a day's course introducing microsurgical techniques on a rat model. The course is supported by video demonstrations and course participants will receive a DVD copy of the free tissue harvest techniques as part of their educational package.

*Course Chairman:
James Brown,
Liverpool*

Organizing Committee:

Ruud Bos, Groningen
James Brown, Liverpool
Guus Rasker, Groningen
René Remie, Lelystad
Oliver Scheunemann, S.O.R.G.

Faculty:
